

IoT Solutions

Hitachi Variable Frequency Drives

Introducing a world where alerts and data come to you
ANYTIME, ANYWHERE and in REAL TIME.

Predictive Maintenance: Indicating the life of the capacitors and the fans as well as indicating the load on the pump.

Multiple access points for remote diagnostics/monitoring: Receive alerts, update or access data from multiple locations to keep your irrigation lines running smoothly and avoid time consuming delays.

Sustainable digital solutions: Generate customized irrigation plans based on IoT data while reducing carbon emissions, saving energy and water, and so much more.

Pump system alarm signaling: Receive SMS message alerts in real time to communicate alarm conditions at the location.
