Standardize Your
Inkjet Printer Start Up

Webinar Aide

Simple Changes Can Improve Efficiency

STEP 1

Inspect your printer, including print head and tubing. Look for any debris, dried ink or damage.

STEP 2

Clean the print head of any dirt or blockage to nozzles. If there is damage to any part of printer, address it before using.

STEP 3

Run a print test sample to make sure codes are clean. This is one of the most important steps to catch any issues before the printer is running on product.
