

## Hitachi Inverters Laundry Industry

The synchronization of washing, drying and folding activities within commercial-grade laundry systems is critical. Protect workflow efficiency by choosing the lineup of A/C Variable Speed Drives from Hitachi. Proven in demanding hospitality applications, senior living communities and large-scale hospitals, Hitachi inverters have earned a reputation for reliability and flexibility to adapt.

warranty

**Hitachi inverters are the smart choice for applications that require performance and flexibility, with all the reliability Hitachi products deliver.**

### LESS IS MORE

You can eliminate the cost and complexity of external controllers by choosing Hitachi inverters. Customizable firmware helps you achieve sequencing or operational parameters without auxiliary equipment. Additionally, Hitachi drives can be set up as part of a communication network via various TCP-based protocols, so you get a product that is capable of expansion.

### EFFICIENCY

Hitachi inverters are fully compatible with the latest PMAC (permanent magnet alternating current) motors. Pairing Hitachi inverters with PMAC motors can reduce energy costs and system space for the benefit of machine design and end-user operations.

### TRUSTED

Known to stand up in tough conditions, you can count on Hitachi inverters to provide dependable service day after day, year after year.

### UPTIME

Features like trip avoidance prevent unusual, but not critical load variations from causing false alarms. This can reduce downtime and result in fewer maintenance calls.

### ADAPTABLE

Maybe you're end user is currently serving a single element in the laundry system, but sees the operation expanding to include more activities in the future. The embedded software within Hitachi inverters allows you to easily alter parameters and adapt the system—an attractive cost-saver over other options. Moreover, our Hitachi drives are already capable of operating permanent magnet motor technologies, so your machine design is not obsolete in the next few years. At Hitachi, we inspire the next.

## Why Do I Need an A/C Inverter From Hitachi?

Hitachi drives offer up to 200% of rated motor torque for those hard to spin loads. Hitachi designs and manufactures our own internal components to provide unmatched reliability. Additionally, Hitachi drives are designed for 10 years of service, therefore your brand reputation is safe using our Hitachi drives.

## Easy Setup and Support You Can Count On

### SETUP

Our innovative and intuitive keyboard makes navigating through the operational settings easy and highly informative due to a spoken language-based display.

### SUPPORT

Before choosing Hitachi, a detailed consult with an expert to help you select the most cost-effective inverter solution. After installation and training, and throughout the life of the product, we've got your back with unmatched support.
