

IoT Solutions

Hitachi Variable Frequency Drives

**Total Remote Control & Monitoring of Pumping Equipment
ANYTIME, ANYWHERE and in REAL TIME.**

Hitachi's IoT Solution: Utilizes reliable cellular communication to cloud computing, allowing the farmer to access the irrigation graphic-user interface from any device, anywhere using their own personal user login and password.

Real IoT-based Remote Control: Saves time by allowing access to each individual pump system's parameters such as: ON/OFF, RESET, Pressure Setpoint, Acceleration and Deceleration Times, Input Filter Timers and more.

Remote Monitoring of Irrigation-Specific Devices: Allows the farmer to save on resources by monitoring temperature, wind, soil PH, humidity and moisture with a 29-day historical table/graph to allow the farmer to make decisions on watering, thus saving resources.

Sustainable Digital Solutions: Farmers can generate customized irrigation plans based on IoT data while reducing carbon emissions, saving time, energy, equipment wear, water, and so much more.
